FOREWORD

Americans, like all people, are concerned about the quality of their lives. Along with many social, economic, and political factors, crime imposes a significant influence on our existence. Its prevalence weighs upon our decisions regarding the location of our residences, the schools to which we send our children, and the shopping centers we frequent.

We Americans can be credited for feeling a moral imperative to correct what is wrong, to change social ills, and to improve our environment. Most of us act rather than avoid; we develop rather than merely subsist. The direct involvement of concerned citizens is demonstrated in many areas. One example is their response to the President's war on drugs. Recognition of illegal drug use as an erosion of society, not as an expression of free choice, has brought citizens' support of the fight against drug abuse to the forefront. Crime Watch, Victims Assistance, and other such programs also serve as examples of citizens' actions against crime.

Likewise, law enforcement, while faced with shrinking budgets, continues to work for improved efficiency and effectiveness in the war against crime. Identified as important and necessary by law enforcement in this endeavor is the collection of enhanced crime statistics. Expanding the amount and detail of crime statistics available for analysis will more meaningfully determine the nature and scope of crime.

In the coming years, law enforcement, with the FBI's support, will begin to compile data far beyond the summary totals now collected. The redesigned UCR Program will address the circumstances of individual criminal events, as well as offender, victim, and arrestee information. Other data vital to an understanding of such issues as illicit drug use, spousal and child abuse, and parental kidnaping will be provided in the new Program.

As more and more law enforcement agencies implement the system, the full significance of the new data will be realized. State and national lawmakers, courts, and city officials, in addition to law enforcement, will have at their disposal a wealth of pertinent information on which to base decisions, enact laws, and utilize resources. Explanations and remedies for criminally related social problems can also hopefully be identified by social research. Most importantly, the American taxpayer will be provided a broad and definitive account of crime.

Crime must be controlled if the quality of life we all seek is to be attained. To be controlled, crime must be understood. Criminal activity, its social causes, and its effects in human and economic terms must be appreciated. I extol the efforts of law enforcement to establish the new crime reporting system that will make the public fully cognizant of the dimension of crime. Law enforcement's recognition that the best served public is the best informed promises a lasting and free society.

CRIME FACTORS

The presence of crime in our Nation is a matter of serious concern not only to the law enforcement profession, but to society at large. Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors affecting the volume and type of crime occurring from place to place are:

Population density and degree of urbanization with size of locality and its surrounding area.

Variations in composition of the population, particularly youth concentration.

Stability of population with respect to residents' mobility, commuting patterns, and transient factors.

Modes of transportation and highway system.

Economic conditions, including median income, destitution, and job availability.

Cultural conditions, such as educational, recreational, and religious characteristics.

Family conditions with respect to divorce and family cohesiveness.

Climate.

Effective strength of law enforcement agencies.

Administrative and investigative emphases of law enforcement.

Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).

Attitudes of citizenry toward crime.

Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, states, or colleges and universities solely on the basis of their population coverage or student enrollment.*

SECTION I
SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

The Uniform Crime Reporting (UCR) Program is a cooperative statistical effort of approximately 16,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. Since 1930, the FBI has administered the Program and issued periodic assessments of the nature and type of crime in the Nation. While the Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, its data have over the years become one of the leading social indicators in the country. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Establishing offenses known to law enforcement as the appropriate measure, the Committee evaluated various crimes on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known collectively as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions by which law enforcement agencies were to submit data, without regard for local statutes, were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January, 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

While throughout the years the Program remained virtually unchanged in terms of the data collected and disseminated, a broad utility had evolved for UCR by the 1980s. Recognizing the need for improved statistics, law enforcement called for a thorough evaluative study that would modernize the UCR Program. The FBI fully concurred with the need for an updated Program and lent its complete support, formulating a comprehensive three-phase redesign effort. The Bureau of Justice Statistics (BJS), the Department of Justice agency responsible for funding criminal justice information projects, agreed to provide financial support for the first two phases. Conducted by an independent contractor, these phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first phase in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study, which would examine potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the potential changes that should be considered during phase two.

Findings from the evaluation's first phase and input on alternatives for the future were also major topics of discussion at the seventh National UCR Conference in July,

1984. Overlapping phases one and two was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April, 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/National Sheriffs' Association (NSA) Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlined recommendations for an expanded, improved UCR Program to meet informational needs into the next century. There were three recommended areas of enhancement to the UCR Program. First, reporting of offenses and arrests would be made by means of an incident-based system. Second, collection of data would be accomplished on two levels. Agencies in level one would report important details about those offenses comprising the current Crime Index, their victims, and arrestees. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies would be included in level two, which would collect expanded detail on all significant offenses. The third proposal involved introducing a quality assurance program.

One of the first actions taken by the FBI to begin implementation was to award a contract for the development of new offense definitions and data elements for the redesigned system. The work involved: (a) revision of the definitions of certain Index offenses; (b) identification of additional significant offenses to be reported; (c) refining definitions for both; and (d) development of data elements (incident details) for all UCR offenses in order to fulfill the requirements of incident-based reporting versus the current summary reporting.

Concurrent with the preparation of the data elements, the FBI studied the various state systems to select an experimental site for implementation of the redesigned Program. In view of its long-standing incident-based Program and well-established staff dedicated solely to UCR, the South Carolina Law Enforcement Division (SLED) was chosen. The SLED agreed to adapt its existing system to meet the requirements of the redesigned Program and collect data on both offenses and arrests relating to the newly defined offenses.

To assist SLED in conducting the pilot project, offense definitions and data elements developed under the private contract were put at the staff's disposal. Also, the FBI's Technical Services Division developed "Automated Data Capture Specifications" for use in adapting the state's data processing procedures to incorporate the revised system. The BJS supplied funding to facilitate needed software revisions. Testing of the new Program was completed in late 1987.

Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the NSA. The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June, 1966, encourages sheriffs throughout the country to participate fully in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the needs arise.

Methods of Data Collection

The information compiled by UCR contributors is forwarded to the FBI either directly from the local law enforcement agency or through a state-level UCR Program. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between local contributors and the FBI. Many of the 41 state Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions

are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention during each month. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, and race of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported annually, as of October 31.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook*, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential

for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records.*

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized. They address Program policy, as well as present information and instructional material, and are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the IACP or the Committee on Uniform Crime Reporting of the NSA.

Reporting Area

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. As discussed in Appendix III, further breakdowns rely on population figures and proximity to metropolitan areas.

A Metropolitan Statistical Area (MSA) is an integrated economic and social unit with a recognized large population nucleus. Each has a central city of at least 50,000 population or an urbanized area of at least 50,000. Contiguous counties which meet specified criteria of metropolitan character and integration, designated suburban counties in UCR, are included. Due to changes in the geographic compositions of MSAs, no year-to-year comparisons of data for those areas should be attempted.

Rural counties and "other cities," most of which are incorporated, are outside MSAs. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of the counties but outside cities, while local police report crimes committed within the city limits.

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of cities with fewer than 50,000 inhabitants together with counties which are within an MSA. In this context, the central city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

During 1987, law enforcement agencies active in the UCR Program represented approximately 235 million United States inhabitants, or 96 percent of the total population as established by the Bureau of the Census. The coverage amounted to 98 percent of the United States population living in MSAs, 93 percent of the population in "other cities," and 89 percent of the rural population.

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 6, 7, 8, and 9, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated as set forth in Appendix I. Unless consisting of estimates for the total United States population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Population Data

Current year population figures for the Nation, states, geographic regions, and divisions are Bureau of the Census provisional estimates as of July 1, 1987. Using these figures along with the 1986 Bureau of the Census provisional estimates for all cities and counties, the populations of individual jurisdictions were extrapolated (see Appendix III). The estimated United States population increase in 1987 was approximately 1 percent over the 1986 estimate.

Offense Estimation

Tables 1 through 5 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas, "other cities," and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Unique estimation procedures were used to produce estimated 1985, 1986, and 1987 forcible rape figures for the State of Illinois. In mid-1984, gender-neutral sex offense legislation was passed in that state. As a result, forcible rape figures furnished subsequently for most local law enforcement agencies by the state-level UCR Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rape totals are not shown in Tables 6, 7, 8, 9, and Appendix IV which present individual MSA, city, county, and university/college data. Since the data supplied were not comparable with those provided for other agencies across the country, the post 1984 forcible rape figures have been estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally. The 1985 and 1986 estimates have been updated and are different than those in previous issues of this book.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2, 5, and 10 years are presented in this book's tabular portions.

Recent Developments

REDESIGN OF UCR—Following the completion of the pilot project conducted by SLED, the FBI produced a draft set of guidelines for an enhanced UCR Program. Law enforcement executives from around the country were then invited to a conference in Orange Beach, Alabama, where the guidelines were presented for final review.

The conference agenda included addresses by the IACP and NSA UCR Committee Chairmen, State UCR Program representatives, FBI executives, and the Executive Director of the IACP. Workshops offered forums for lively exchanges of ideas and opinions on the enhanced Program's content and possible output. Computer displays in an automation workshop acquainted attendees with state-of-the-art law enforcement records software.

During the conference, the Association of State UCR Programs overwhelmingly passed two resolutions. One encouraged the FBI to seek the participation of all Federal law enforcement agencies in reporting crime through the new UCR Program. The other endorsed the efforts of the FBI to produce a final version of the revised UCR by July 1, 1988. It also urged the Association membership to go forward with implementation in their states at a pace commensurate with their abilities and with regard to the limitations of their contributing agencies. The FBI supports these resolutions, and in fact, disapproves of any effort to push chiefs or sheriffs toward adoption of the new UCR Program prior to their acquisition of required resources (personnel, data processing, etc.).

Three overall conference endorsements were passed without dissent. First, that there be established a new, incident-based national crime reporting system; second, that the FBI manage this Program; and third, that an Advisory Policy Board composed of law enforcement executives be formed to assist in the direction and implementation of the new Program.

As presented at the conference, the enhanced UCR Program will collect data on each single incident and arrest within 24 crime categories. For each offense known to police within these categories, incident, victim, property, offender, and arrestee information will be gathered when available. The goal of the redesign is to modernize crime information by collecting data presently maintained in law enforcement records; the enhanced UCR Program is, therefore, a byproduct of current records systems. The integrity of UCR's long running statistical series will, of course, be maintained.

ADVISORY POLICY BOARD—The implementation of an expanded and enhanced UCR Program will result in a wealth of crime data never before available. To function in an advisory capacity concerning UCR policy and provide suggestions on uses of the data collected under the enhanced UCR Program, law enforcement professional organizations have recommended the creation of an Advisory Policy Board (APB). The FBI supports the APB concept and has formally begun the process to obtain approval for the creation of a Board comprised of executives from local law enforcement agency data contributors. An APB, the FBI believes, will serve not only the best interests of law enforcement but the American public as well.

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED—In connection with its Law Enforcement Officers Killed and Assaulted Program, the national UCR staff is conducting a special statistical effort to study officer homicides in much greater detail than ever before. With the assistance of the FBI's Behavioral Science Unit and an outside consultant, the staff has developed a protocol from which to interview offenders convicted of having killed law enforcement officers. The main objective of the interviews is to identify any measures the officers could have taken or avoided that would have saved their lives. An attempt is also being made to identify danger signals that may have been exhibited by the perpetrator. The protocol has been tested, and over 20 interviews have been conducted. When complete, the project's data should lend new insight to officer survival training programs.

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II
CRIME INDEX OFFENSES REPORTED

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

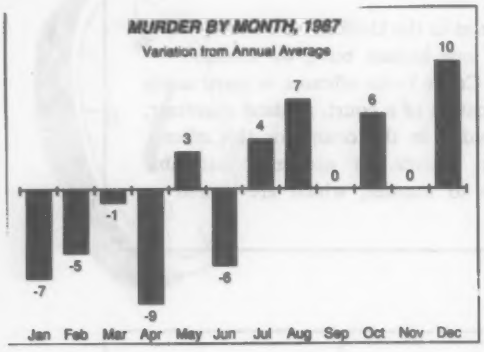
The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

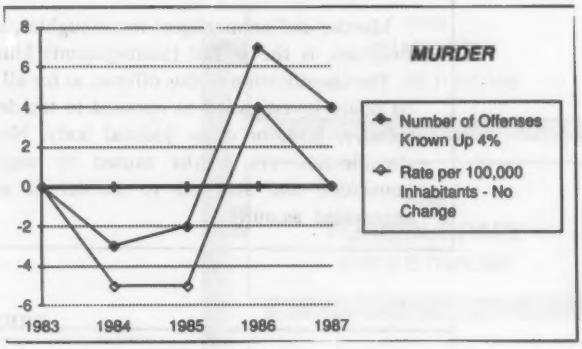
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1986	*20,613*	*8.6*
1987	*20,096*	*8.3*
Percent change	*– 2.5*	*– 3.5*

Volume

The estimated number of murders in the United States totaled 20,096 during 1987, representing 1 percent of the violent crimes committed. More persons were murdered during December, while the lowest number of incidents was recorded in April.





Murder by Month, 1983-1987

[Percent of annual total]

Months	1983	1984	1985	1986	1987
January	8.4	8.3	8.1	7.7	7.7
February	7.6	7.5	7.9	7.0	7.9
March	8.4	8.1	8.1	8.3	8.2
April	8.0	7.9	7.6	8.0	7.6
May	8.3	8.0	7.6	8.2	8.6
June	7.6	7.8	8.2	8.3	7.8
July	8.9	8.6	9.3	9.4	8.6
August	8.9	8.8	9.1	9.4	8.9
September	8.7	8.7	8.1	9.1	8.3
October	8.4	8.8	8.4	8.3	8.8
November	7.8	8.6	8.2	8.0	8.3
December	9.0	9.0	9.4	8.4	9.1

Geographically, the Southern States, the most populous region, accounted for 42 percent of the murders. The Western States reported 21 percent; the Midwestern States, 20 percent; and the Northeastern States, 17 percent.

Trend

There were 3 percent fewer murders reported nationwide in 1987 than in 1986. The Nation's cities overall experienced a decrease of 4 percent, with declines ranging from 12 percent in those with populations from 250,000 to 499 999 to 1 percent in those with populations of 1 million or more. Suburban counties recorded no change, and the rural counties registered a 4-percent increase.

Viewed regionally, the murder counts declined 4 and 6 percent in the South and West, respectively, from 1986 to 1987. The Northeast and Midwest each showed upswings of 1 percent for the 2-year period.

The accompanying chart reveals a 4-percent rise nationally in the murder counts from 1983 to 1987. The 10-year trend showed the 1987 total 3 percent above the 1978 level.

Rate

Down 3 percent from 1986, the 1987 United States murder rate was 8 per 100,000 inhabitants. On a regional basis, the Southern States averaged 10 murders per 100,000 people; the Western States, 9 per 100,000; and both the Northeastern and Midwestern States, 7 per 100,000. Rate decreases were seen in two of the four regions, 1986 versus 1987. The murder rate in the West was down 8 percent and in the South, 6 percent. The Northeast and Midwest recorded increases of 1 and 2 percent, respectively.

The Nation's metropolitan areas reported a 1987 murder rate of 9 victims per 100,000 inhabitants. In the rural counties, the rate was 6 per 100,000, and in the cities outside metropolitan areas, it was 5 per 100,000.

Nature

Supplemental data provided by contributing agencies recorded information for 17,859 of the estimated 20,096 murders in 1987. Submitted monthly, the data consist of the age, sex, and race of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on this information, 74 percent of the murder victims in 1987 were males. Ninety percent were persons 18 years of age or older, with 49 percent aged 20 through 34 years. Considering victims for whom race was known, an average of 53 of every 100 were white, 45 were black, and the remainder were persons of other races.

[1]Does not include unknown ages.

Data based on incidents involving one victim and one offender showed that in 1987, 94 percent of the black murder victims were slain by black offenders, and 88 percent of the white murder victims were killed by white offenders. Likewise, males were most often slain by males (84 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

Victim/Offender Relationship by Race and Sex, 1987

Firearms, as in previous years, were the weapons used in approximately 3 of every 5 murders committed in the United States. Of all murders, 44 percent were by handguns; 6 percent by shotguns; and 4 percent by rifles. Other or unknown types of firearms accounted for another 5 percent of the total murders.

Among the remaining weapons, cutting or stabbing instruments were employed in 20 percent of the murders; blunt objects (clubs, hammers, etc.) in 6 percent; and other dangerous weapons, such as poison, explosives, etc., in 8 percent. Personal weapons (hands, fists, feet, etc.) were employed in 7 percent.

[2]Does not include unknown ages.

Supporting the philosophy that murder is primarily a societal problem over which law enforcement has little or no control is the fact that nearly 3 of every 5 murder victims in 1987 were related to (17 percent) or acquainted with (40 percent) their assailants. Among all female murder victims in 1987, 29 percent were slain by husbands or boyfriends. Six percent of the male victims were killed by wives or girlfriends.

Arguments resulted in 37 percent of the murders during the year. Twenty percent occurred as a result of felonious activities such as robbery, arson, etc., while another 1 percent were suspected to have been the result of some felonious activity. Three percent of the murders were committed during brawls while offenders were under the influence of alcohol or narcotics. The table on the following page shows murder circumstances for the past 5 years.

Murder Circumstances by Relationship, 1987

[2]Includes murders committed during brawls while offender was under the influence of alcohol and/or narcotics.

Clearances

Murder continued to have a higher clearance rate than any other Crime Index offense. Law enforcement agencies nationwide, as well as in the cities, cleared 70 percent of the murders occurring in their jurisdictions during 1987. Cities under 10,000 in population reported the most successful clearance rate, 76 percent. Seventy-five percent of murders in rural counties and 68 percent of those in suburban counties were cleared.

Regionally, the murder clearance rate was highest in the Southern States, 72 percent. Following were the Northeastern States and Midwestern States with 69 percent each and the Western States with 68 percent.

Persons under 18 years of age were involved in murder less often than in any other offense in 1987. They accounted for 5 percent of the willful killings cleared by law enforcement nationally, as well as in cities. Six percent of the suburban county and 7 percent of the rural county clearances involved only persons in this young-age group.

Persons Arrested

Murder arrests overall decreased 1 percent in 1987 from the 1986 volume. Arrests of persons aged 18 and over declined 1 percent, while those of younger persons increased 6 percent. During the same 2-year period, male arrests decreased 1 percent and female arrests were up 1 percent.

Of all murder arrestees in 1987, 44 percent were under 25 years of age, with 10 percent of the total being 17 or younger. The 18- to 24-year age group showed the greatest involvement in this offense, accounting for 34 percent of the total 1987 murder arrests.

Whites comprised 46 percent of the total arrestees for murder in 1987. Blacks made up 52 percent, and the remainder were of other races.

Long-term trends indicate the 1987 murder arrest total was 3 percent below the 1983 level but 4 percent above the 1978 figure.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

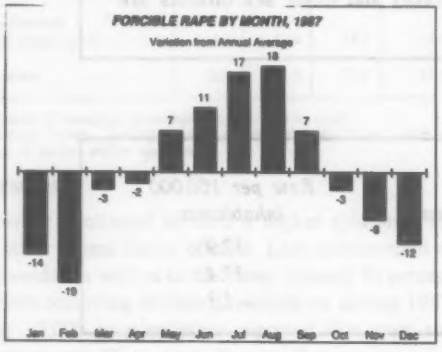
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1986	*91,459*	*37.9*
1987	*91,111*	*37.4*
Percent change	*– .4*	*– 1.3*

Volume

During 1987, there were an estimated 91,111 forcible rapes in the Nation. The rape total comprised 1 percent of the Crime Index offenses and 6 percent of the violent crimes. Geographically, the Southern States, the region with the largest population, accounted for 36 percent of the forcible rapes reported to law enforcement. Following were the Midwest with 24 percent, the West with 23 percent, and the Northeast with 16 percent.

Monthly totals showed the greatest number of forcible rapes were reported during the summer, with August recording the highest frequency. The lowest total was registered in February.



Forcible Rape by Month, 1983-1987

[Percent of annual total]

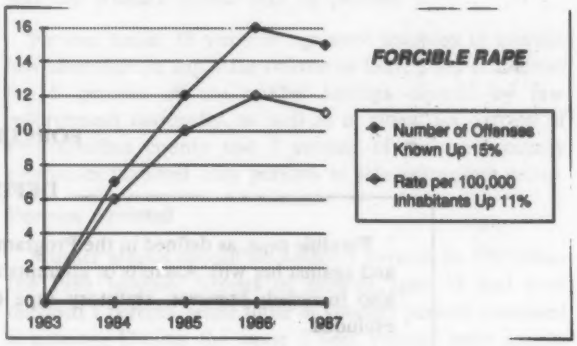
Months	1983	1984	1985	1986	1987
January	7.3	7.1	7.2	7.1	7.2
February	6.9	7.1	6.6	6.7	6.8
March	7.6	7.6	8.2	7.9	8.1
April	7.9	7.7	8.3	8.1	8.2
May	8.5	8.6	8.9	8.8	8.9
June	8.8	8.9	9.0	9.2	9.3
July	9.9	9.9	10.1	9.8	9.7
August	10.4	10.2	9.9	10.2	9.8
September	9.1	9.1	8.8	9.1	8.9
October	8.7	9.0	8.5	8.4	8.1
November	7.7	7.2	7.7	7.8	7.7
December	7.1	7.5	6.9	7.0	7.3

Trend

Compared to the previous year, the 1987 forcible rape volume decreased less than 1 percent nationwide and in the cities collectively. Rural counties recorded a decrease of 1 percent, while the suburban area agencies registered an increase of 2 percent. City trends ranged from a 4-percent decline to a 7-percent increase.

Among the geographic regions, the Northeastern States recorded a 4-percent increase; the Midwestern States, a less than 1-percent rise; the Southern States, a 2-percent decline; and the Western States, a 1-percent drop.

National trends for 5 and 10 years show that the forcible rape total rose 11 percent over 1983 and 21 percent above 1978.



Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. In 1987, an estimated 73 of every 100,000 females in the country were reported rape victims, a decrease of 1 percent from the 1986 rate. Since 1983, the female forcible rape rate has risen 11 percent.

Female forcible rape rates for 1987 showed there were 83 victims per 100,000 females in MSAs, 47 per 100,000 females in cities outside metropolitan areas, and 36 per 100,000 females in rural counties.

Regionally, the highest female rape rate was in the Western States, which recorded 83 victims per 100,000 females. Following were the Southern States with a rate of 76, the Midwestern States with 72, and the Northeastern States with 57.

Nature

Of all reported forcible rapes during 1987, 81 percent were rapes by force. The remainder were attempts or assaults to commit forcible rape. An increase of less than 1 percent was registered in the number of rapes by force, while attempts to commit rape decreased 2 percent from the 1986 figures.

Clearances

Nationwide in 1987, 53 percent of the forcible rapes reported to law enforcement were cleared by arrest or exceptional means. Rural county agencies cleared 57 percent of the offenses brought to their attention, while suburban county agencies and those in cities cleared 54 percent and 52 percent, respectively.

Clearance rates for the regions ranged from 45 percent in the Midwestern States to 57 percent in the Southern States. In the Northeastern States, the clearance rate for forcible rape was 56 percent, and in the Western States, it was 51 percent.

In the country as a whole, the Nation's cities, and the suburban counties, 9 percent of the forcible rape clearances involved only persons under the age of 18. Rural counties recorded a 13-percent involvement of this age group.

Persons Arrested

From 1986 to 1987, forcible rape arrests decreased 2 percent nationwide, as well as in the rural counties. Arrests for this offense declined 5 percent in the suburban counties and were down 1 percent in the Nation's cities. For the 5-year period, 1983 to 1987, increases of 9 percent were recorded for the total forcible rape arrests, 8 percent for those of adults, and 15 percent for arrests of persons under 18 years of age.

Of the forcible rape arrestees in 1987, 45 percent were persons under the age of 25, with 29 percent of the total being in the 18- to 24-year age group. Fifty percent of those arrested were white, 48 percent were black, and all other races comprised the remainder.

ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

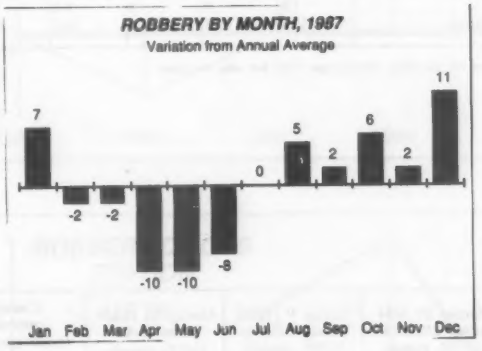
TREND

Year	Number of offenses	Rate per 100,000 inhabitants
1986	542,775	225.1
1987	517,704	212.7
Percent change	-4.6	-5.5

Volume

Accounting for 4 percent of all Index crimes and 35 percent of violent crimes, the estimated robbery total in 1987 was 517,704. During the year, robberies occurred most frequently in December and least often in April and May.

Regionally, the most populous Southern States registered 31 percent of all reported robberies. Following were the Northeastern States with 28 percent, the Western States with 21 percent, and the Midwestern States with 20 percent.



Robbery by Month, 1983-1987

[Percent of annual total]

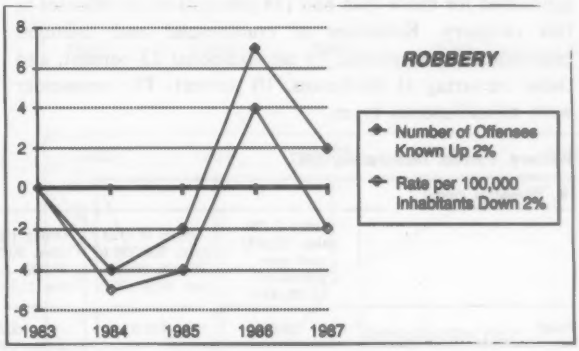
Months	1983	1984	1985	1986	1987
January	9.5	8.9	8.6	8.7	8.9
February	8.1	8.2	7.4	7.7	8.1
March	8.3	8.1	7.9	8.2	8.2
April	7.6	7.6	7.3	7.6	7.5
May	7.4	7.6	7.5	7.7	7.5
June	7.4	7.5	7.7	8.0	7.6
July	7.9	7.9	8.6	8.4	8.3
August	8.6	8.5	8.9	9.3	8.7
September	8.4	8.2	8.4	8.6	8.5
October	8.8	9.0	9.1	8.7	8.8
November	8.8	8.6	8.8	8.3	8.5
December	9.2	9.9	9.7	9.0	9.2

Trend

Downward trends in robbery were evident nationwide and throughout all population groups in 1987. Nationally, in cities, and in rural counties the decline was 5 percent, while in the suburban counties, it was 4 percent. Of all population groups, cities with populations of 500,000 to 999,999 registered the greatest decrease, 8 percent.

Two-year regional trends show the number of robberies were down in all regions. The decreases were 9 percent in the West; 4 percent in the Northeast; and 3 percent in both the Midwest and South.

The accompanying chart depicts the trend in the robbery volume, as well as the robbery rate, for the years 1983-1987. In 1987, the number of robbery offenses was 2 percent higher than in 1983 and 21 percent above the 1978 total.



Rate

The national robbery rate in 1987 was 213 per 100,000 people, a decrease of 6 percent from the 1986 rate. In metropolitan areas, the robbery rate was 269; in cities outside metropolitan areas, it was 50; and in the rural areas, it was 15. With 900 robberies per 100,000 inhabitants, the highest rate was recorded in cities with populations over 1 million.

Robbery rates declined in all regions during 1987. The Midwest's rate of 173 per 100,000 population was down 3 percent; the South's rate of 192 was 4 percent lower; the Northeast's rate of 284 was down 5 percent; and the West's rate of 223 represented an 11-percent decrease.

Nature

In 1987, a total estimated national loss of $327 million was due to robberies. The value of property stolen during robberies averaged $631 per incident. Average dollar losses ranged from $292 taken during robberies of convenience stores to $3,013 per bank robbery. The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

As in previous years, robberies on streets or highways accounted for more than half (54 percent) of the offenses in this category. Robberies of commercial and financial establishments accounted for an additional 23 percent, and those occurring at residences, 10 percent. The remainder were miscellaneous types.

Robbery, Percent Distribution, 1987

[1]Because of rounding, percentages may not add to totals.

Robbery by type for 1986-1987 showed bank robberies were up 6 percent and convenience store robberies increased 1 percent. Decreases during this 2-year period were seen for street/highway robberies, down 7 percent; both residential and gas or service station robberies dropped 5 percent; and robberies of commercial houses decreased 2 percent.

Forty-four percent of all robberies in 1987 were committed through the use of strong-arm tactics. Firearms were used in 33 percent, knives or cutting instruments in 13 percent, and other weapons in the remaining 10 percent. A comparison of 1986 and 1987 robbery totals by weapon showed those by firearms down 8 percent; those by knives or cutting instruments down 5 percent; and both strong-armed robberies and those by other dangerous weapons down 3 percent.

Robbery, Type of Weapons Used, 1987

Clearances

Twenty-seven percent of the robbery offenses reported to law enforcement were cleared during 1987. The highest robbery clearance rate—37 percent—was registered by rural law enforcement agencies. Suburban county agencies cleared 28 percent and those in cities, 26 percent. Regional robbery clearance percentages were 28 percent in both the South and West, 26 percent in the Northeast, and 22 percent in the Midwest.

Nationally, as well as for city and suburban county law enforcement agencies, persons under the age of 18 were the offenders in 10 percent of all 1987 robbery clearances. This age group accounted for 7 percent of the rural county clearances.

Persons Arrested

Arrests for robbery declined 4 percent nationwide in 1987 when compared to 1986. Decreases were also experienced in cities and the suburban counties, 3 and 16 percent, respectively. The rural counties, however, showed an increase of 7 percent in the number of persons arrested for this offense.

Sixty-one percent of all robbery arrestees in 1987 were under 25 years of age, and 92 percent were males. Sixty-three percent of those arrested were black, 36 percent were white, and the remainder were of other races.

The total number of robbery arrests decreased 4 percent during the 5-year period, 1983-1987. For the same timespan, arrests of males for robbery declined 5 percent, while female arrests rose 6 percent. Juvenile arrests were down 19 percent, while those of persons 18 years of age and older were up 2 percent.

AGGRAVATED ASSAULT

DEFINITION

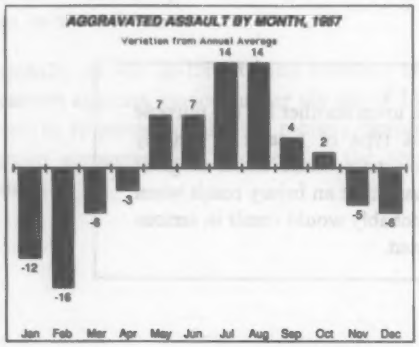
Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1986	*834,322*	*346.1*
1987	*855,088*	*351.3*
Percent change	*+ 2.5*	*+ 1.5*

Volume

Totaling an estimated 855,088 offenses nationally, aggravated assaults in 1987 occurred most frequently in the summer months. Geographic distribution figures show that 36 percent of the aggravated assault volume was accounted for by the Southern States, 26 percent by the Western States, 20 percent by the Midwestern States, and the remainder by the Northeastern States.



Aggravated Assault by Month, 1983-1987

[Percent of annual total]

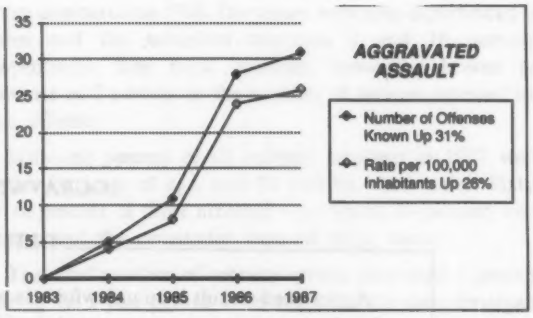
Months	1983	1984	1985	1986	1987
January	7.7	7.0	7.0	6.8	7.3
February	7.1	7.0	6.8	6.3	7.0
March	7.9	7.8	8.2	8.0	7.8
April	8.1	7.9	8.2	8.1	8.1
May	8.9	8.7	8.8	9.1	8.9
June	8.9	9.1	9.0	9.7	8.9
July	9.8	9.6	9.5	10.0	9.5
August	9.7	9.5	9.5	10.0	9.5
September	8.9	8.8	8.9	8.8	8.7
October	8.5	8.9	8.8	8.3	8.5
November	7.4	7.6	7.9	7.6	7.9
December	7.3	8.1	7.4	7.4	7.8

Trend

In 1987, aggravated assault increased 2 percent nationwide in volume as compared to 1986. For the 2-year period, the trend in the geographic regions ranged from an increase of 7 percent in the Northeastern States to a decrease of 1 percent in the Midwestern States. While a decrease of less than 1 percent was recorded in the Southern States, an increase of 6 percent was reported in the Western States.

By population grouping, cities with 1 million or more inhabitants recorded the greatest rise in aggravated assaults from 1986, 8 percent. Upswings of 3 percent in the cities collectively and 1 percent in the suburban and rural counties were registered for this offense during the same time period.

Five- and 10-year trends show aggravated assaults up 31 percent above the 1983 level and 50 percent over the 1978 experience.



Rate

Up 2 percent above the 1986 rate, there were 351 reported victims of aggravated assault for every 100,000 people nationwide in 1987. Higher than the national average, the rate in metropolitan areas was 400 per 100,000. Cities outside metropolitan areas experienced a rate of 272 and rural counties, a rate of 139.

Nationwide, the rate for aggravated assault showed increases of 26 percent over 1983 and 34 percent over 1978.

Nature

In 1987, 32 percent of the aggravated assaults were committed with blunt objects or other dangerous weapons. Of the remaining weapon categories, personal weapons such as hands, fists, and feet were used in 25 percent of the offenses; and knives or cutting instruments and firearms in 21 percent each.

A comparison of the 1986 and 1987 figures showed that aggravated assaults by knives or cutting instruments decreased 1 percent. A 2-percent increase was recorded in aggravated assaults committed with firearms and blunt objects or other dangerous weapons. Assaults where personal weapons were used showed the greatest increase during this 2-year period, 7 percent. The following table shows the 1987 regional experience of aggravated assault by type of weapon used.

Aggravated Assault, Type of Weapons Used, 1987

[Percent distribution by region]

Region	Total all weapons[1]	Firearms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons
Total	100.0	21.4	21.4	31.8	25.4
Northeastern States	100.0	14.9	25.3	34.7	25.1
Midwestern States	100.0	24.4	22.7	34.2	18.7
Southern States	100.0	25.6	23.4	31.5	19.5
Western States	100.0	17.7	15.5	28.7	38.1

[1]Because of rounding, percentages may not add to totals.

Clearances

During 1987, law enforcement agencies nationwide cleared 59 percent of the aggravated assaults reported. The cities collectively reported a 58-percent clearance rate while the highest rate, 67 percent, was recorded by cities with populations less than 10,000. Suburban and rural county law enforcement agencies cleared 60 and 64 percent, respectively.

Geographically, clearance percentages for aggravated assault were 61 percent in the West, 60 percent in the South, 58 percent in the Northeast, and 54 percent in the Midwest.

Nine percent of the clearances reported by suburban county agencies involved only persons under age 18. Persons in this age group were identified as the assailants in 8 percent of the national and city clearances and 7 percent of those in rural counties.

Persons Arrested

The estimated 352,450 persons arrested for aggravated assault in 1987 represented 65 percent of all arrestees for violent crimes. Whites comprised 58 percent of the arrestees; blacks, 40 percent; and all other races, the remainder. Eighty-seven percent of the arrestees were males and 13 percent, females.

Total arrests for aggravated assault were up 4 percent in 1987 from the 1986 total. During this 2-year period, adult arrests rose 4 percent and those of juveniles increased 3 percent. A comparison of 1983 and 1987 figures showed total arrests for this offense up 22 percent; those of persons under age 18, up 19 percent; and those of adults, up 23 percent.

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

TREND

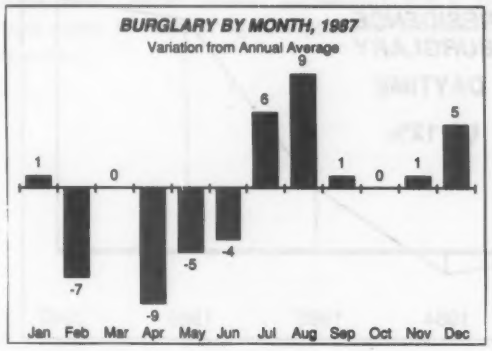
Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1986	*3,241,410*	*1,344.6*
1987	*3,236,184*	*1,329.6*
Percent change	*– .2*	*– 1.1*

Volume

Estimated at over 3.2 million in 1987, burglaries accounted for 24 percent of all Crime Index offenses and 27 percent of the property crimes.

Distribution figures for the regions showed that the highest burglary volume occurred in the most populous Southern States, accounting for 41 percent of the total. The Western States followed with 23 percent, the Midwestern States with 20 percent, and the Northeastern States with 16 percent.

Like the previous year, more burglaries occurred in August than any other month. The lowest number was reported in April.



Burglary by Month, 1983-1987

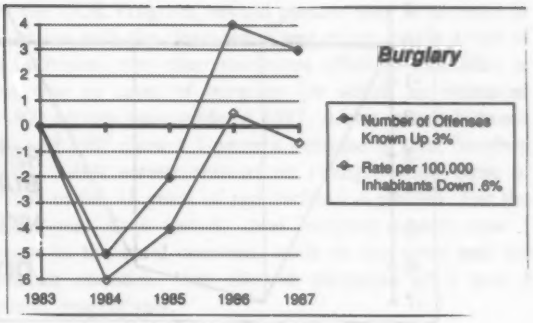
[Percent of annual total]

Months	1983	1984	1985	1986	1987
January	9.1	8.3	8.2	8.4	8.4
February	7.8	7.9	7.2	7.5	7.8
March	8.5	8.0	8.2	8.3	8.3
April	7.9	7.8	7.8	7.9	7.6
May	8.1	8.0	8.0	8.1	8.0
June	7.8	7.8	7.9	8.1	8.0
July	8.5	8.7	9.0	8.9	8.8
August	9.0	8.9	9.1	9.0	9.1
September	8.4	8.3	8.5	8.5	8.4
October	8.5	8.8	9.0	8.4	8.4
November	8.3	8.4	8.5	8.1	8.4
December	8.1	9.0	8.8	8.8	8.8

Trend

Nationwide, the burglary volume decreased less than 1 percent in 1987 from the 1986 total. Cities with populations of 1 million or more showed the largest decline, 4 percent. The rural counties registered a 2-percent increase and the suburban counties, a 1-percent rise.

Regionally, the Western and Northeastern States reported decreases in burglaries, 7 and 1 percent, respectively. Burglary rose 4 percent in the Southern States and 1 percent in the Midwestern States.



Rate

A burglary rate of 1,330 per 100,000 inhabitants was registered nationwide in 1987. The rate decreased 1 percent from 1986 and was 7 percent below the 1978 rate. In 1987, for every 100,000 in population, the rate was 1,485 in the metropolitan areas, 1,042 in the cities outside metropolitan areas, and 670 in the rural counties.

Regionally, the burglary rate was 1,565 in the Southern States, 1,524 in the Western States, 1,088 in the Midwestern States and 1,031 in the Northeastern States. A comparison of 1986 and 1987 rates showed declines of 1 percent in the Northeast and 9 percent in the West. The Midwest and South both registered burglary rate increases, 1 and 3 percent, respectively.

Nature

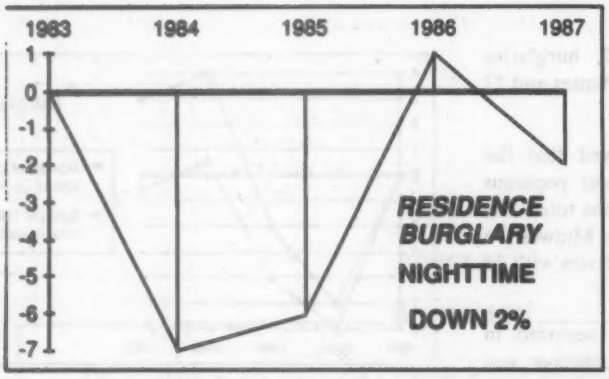
Two of every 3 burglaries in 1987 were residential in nature. Seventy percent of all burglaries involved forcible entry, 21 percent were unlawful entries (without force), and the remainder were forcible entry attempts. Considering those offenses for which time of occurrence was reported, 52 percent occurred at night and 48 percent during the daytime.

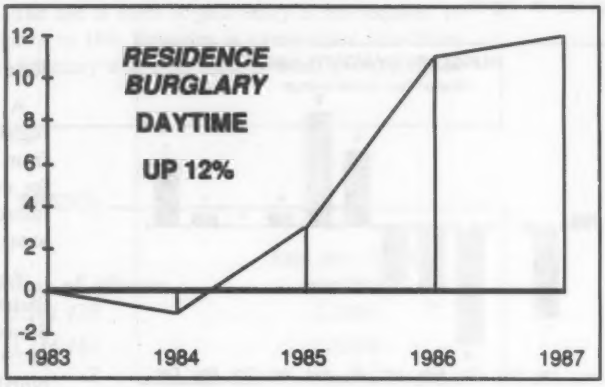
Burglary victims suffered losses estimated at $3.2 billion in 1987, and the average dollar loss per burglary was $975. The average loss for residential offenses was $1,004, while for nonresidential property, it was $914.

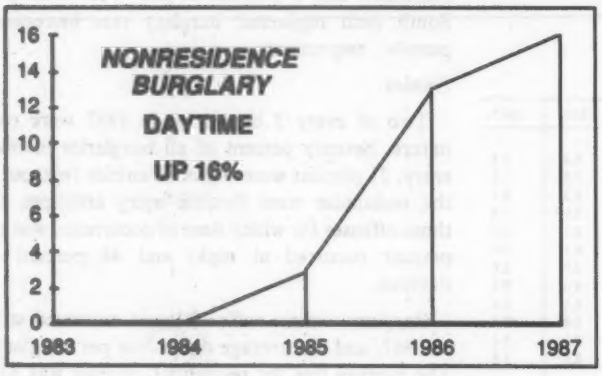
Residential burglary showed virtually no change from 1986 to 1987; nonresidential offenses were down 1 percent during the same period.

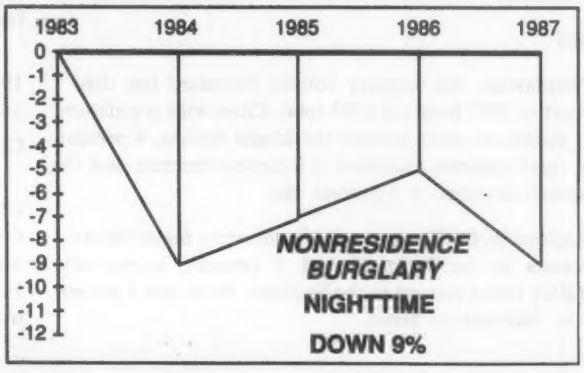
Clearances

In 1987, 14 percent of the burglaries brought to the attention of law enforcement agencies across the country were cleared. Geographically, a 15-percent clearance rate was registered in the South. In the Northeast, the rate was 14 percent; in the West, 13 percent; and in the Midwest, it was 11 percent.









Burglaries of unknown time of occurrence are not included.

Rural county law enforcement cleared 16 percent of the burglaries in their jurisdictions. Those in the suburban counties recorded a clearance rate of 15 percent, and agencies in cities obtained clearances in 13 percent.

Adults were involved in 81 percent of all burglary offenses cleared, and only young people under 18 years of age were offenders in the remaining 19 percent. Similar to the national experience, persons under age 18 accounted for 19 percent of the burglary clearances in cities. Suburban county law enforcement agencies reported 20 percent of their burglary clearances involved only juveniles, while those in rural counties registered 23 percent. The highest degree of juvenile involvement was recorded in the Nation's smallest cities (under 10,000 population) where young persons under 18 years of age comprised 27 percent of the clearances.

Persons Arrested

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary for which an estimated 443,400 arrests were made in 1987. Arrest trends between 1986 and 1987 show a 1-percent decrease in total burglary arrests. Adult arrests showed no change, while those of persons under 18 years of age declined 4 percent. For the same 2-year time period, total burglary arrests rose 1 percent in the rural counties, while in the cities and the suburban counties, they showed decreases of 1 and 4 percent, respectively.

Ninety-two percent of the burglary arrestees during 1987 were males and 69 percent were under 25 years of age. Of the total burglary arrestees, whites accounted for 67 percent, blacks for 31 percent, and other races for the remainder.

LARCENY-THEFT

DEFINITION

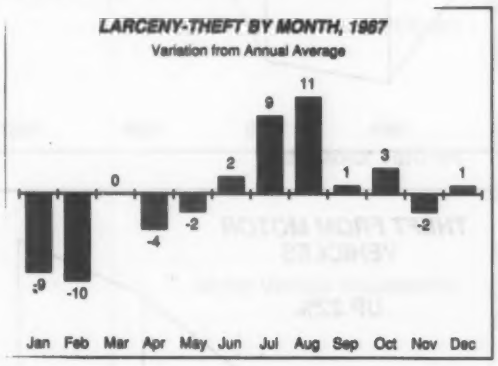
Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1986	*7,257,153*	*3,010.3*
1987	*7,499,851*	*3,081.3*
Percent change	*+ 3.3*	*+ 2.4*

Volume

Larceny-theft offenses, estimated at 7,499,851 during 1987, comprised 56 percent of the Crime Index total and 62 percent of the property crimes. When viewed monthly, larceny-thefts were recorded most often during August and least frequently in February.



Regionally, the most populous Southern States recorded 36 percent of the total. The Western States registered 24 percent; the Midwestern States, 23 percent; and the Northeastern States, 17 percent.

Larceny-Theft by Month, 1983-1987

[Percent of annual total]

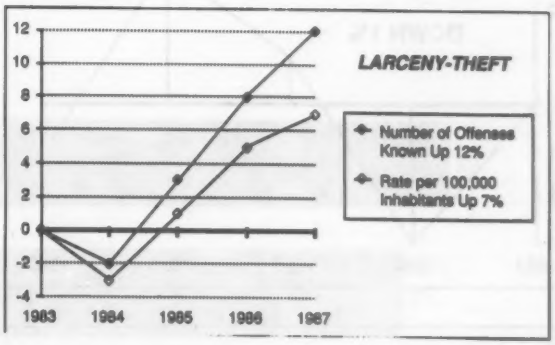
Months	1983	1984	1985	1986	1987
January	8.1	7.5	7.4	7.8	7.6
February	7.4	7.6	7.0	7.2	7.5
March	8.4	8.0	8.2	8.3	8.3
April	8.1	8.0	8.1	8.2	8.0
May	8.4	8.2	8.4	8.4	8.2
June	8.5	8.4	8.5	8.6	8.5
July	8.9	9.0	9.3	9.1	9.1
August	9.4	9.4	9.5	9.3	9.2
September	8.4	8.3	8.4	8.4	8.4
October	8.6	8.9	8.9	8.5	8.6
November	8.0	8.2	8.2	7.9	8.1
December	7.7	8.5	8.1	8.3	8.4

Trend

Compared to 1986, the 1987 volume of larceny-thefts increased 3 percent in the Nation, as well as in all cities collectively. Suburban and rural counties also showed increases, 4 and 2 percent, respectively.

Volume increases were recorded in the Southern States, 5 percent; in the Midwestern States, 4 percent; and in the Northeastern States, 3 percent. The Western States registered virtually no change.

The 5- and 10-year larceny trends for the Nation showed a 12-percent increase over 1983 and a 25-percent rise over 1978 figures.



Rate

The 1987 larceny-theft rate was 3,081 per 100,000 United States inhabitants, 2 percent higher than in 1986. The 1987 rate was 7 percent above the 1983 level and 12 percent higher than in 1978. The 1987 rate was 3,444 per 100,000 inhabitants of metropolitan areas; 3,303 per 100,000 population in cities outside metropolitan areas; and 943 per 100,000 people in the rural counties.

Regionally, the Southern States' larceny-theft rate increased 4 percent over the 1986 level to 3,238 per 100,000 inhabitants. Both showing 3-percent rises, the rates were 2,889 in the Midwestern States and 2,544 in the Northeastern States. The rate in the Western States dropped 2 percent from 3,662 in 1986 to 3,590 in 1987.

Nature

The average value of property stolen due to larceny-theft during 1987 was $404, up from $400 in 1986. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was $3 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 26 percent of the thefts reported to law enforcement during 1987 ranged from $50 to $200, while 34 percent were over $200.

Losses of goods and property reported stolen as a result of pocket-picking averaged $286; purse-snatching, $238; and shoplifting, $96. Thefts from buildings resulted in an average loss of $665; from motor vehicles, $434; and from coin-operated machines, $128. The average value loss due to thefts of motor vehicle accessories was $288 and for thefts of bicycles, $172.

Larceny Analysis - 1987
percent

Thefts of motor vehicle parts, accessories, and contents made up the largest portion of reported larcenies—38 percent. Also contributing to the high volume of thefts were those from buildings and shoplifting, each accounting for 15 percent; and bicycle thefts, accounting for 6 percent. The remainder were distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts. The accompanying table presents the distribution of larceny-theft by type and geographic region.

Larceny Analysis by Region, 1987

[Percent distribution by region]

	United States total	North-eastern States	Mid-western States	Southern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0
Pocket-picking	1.1	3.6	.8	.4	.6
Purse-snatching	1.2	2.2	1.2	1.0	.8
Shoplifting	15.3	12.2	12.8	16.1	18.2
From motor vehicles (except accessories)	21.1	20.7	19.0	19.2	25.9
Motor vehicle accessories	16.9	18.5	16.2	18.6	13.8
Bicycles	6.4	6.2	6.7	5.7	7.3
From buildings	14.6	19.1	18.8	11.1	13.2

All others	22.6	16.6	23.9	26.7	19.4

[1]Because of rounding, percentages may not add to totals.

Clearances

Twenty percent of the reported larceny-thefts were cleared nationwide and in cities during 1987. The highest clearance rate, 24 percent, was reported by law enforcement agencies in cities from 10,000 to 24,999 in population. Those in suburban counties recorded an 18-percent rate, and in rural counties, 17 percent.

Regionally, law enforcement agencies in the West cleared 22 percent of the larceny offenses brought to their attention. The clearance rates in the South, Midwest, and Northeast were 19 percent.

Twenty-two percent of the national clearances for larceny-theft involved only offenders under 18 years of age. Twenty-three percent of the clearances in cities, 21 percent of those in suburban counties, and 19 percent of those in rural counties were accounted for by persons in this age group.

Persons Arrested

Between 1986 and 1987, the total number of persons arrested for larceny-theft increased 3 percent. Female arrests for this offense were up 6 percent, and those of males increased 2 percent. During this same period, adult arrests rose 4 percent, while those of persons under 18 years of age showed virtually no change.

Considering a longer timeframe, larceny-theft arrests showed a 12-percent increase for the 5-year period, 1983-1987. Juvenile arrests were up 6 percent, and those of adults rose 14 percent. Male arrests increased 9 percent and female arrests, 17 percent during this 5-year timespan.

Larceny-thefts not only comprised the largest portion of Crime Index offenses reported to law enforcement, this offense accounted for 55 percent of the arrests for Index crimes and 70 percent of those for property crimes in 1987. Forty-five percent of the larceny arrests were of persons under 21 years of age, and 31 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1987, comprised 31 percent of all larceny-theft arrestees.

Whites accounted for 66 percent of the total larceny-theft arrests, blacks for 32 percent, and all other races for the remainder.

MOTOR VEHICLE THEFT

DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

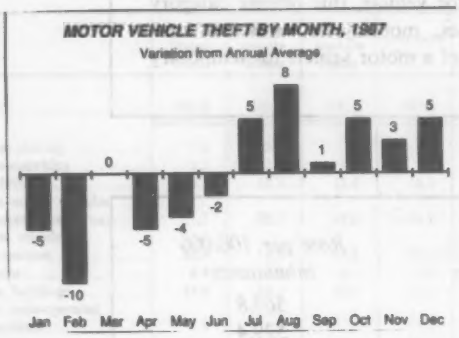
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1986	*1,224,137*	*507.8*
1987	*1,288,674*	*529.4*
Percent change	*+ 5.3*	*+ 4.3*

Volume

An estimated total of 1,288,674 thefts of motor vehicles occurred in the United States during 1987. These offenses comprised 11 percent of all property crimes. The regional distribution of motor vehicle theft showed 31 percent of the volume was in the Southern States, 25 percent in the Northeastern States, 24 percent in the Western States, and 20 percent in the Midwestern States.

Motor vehicle theft figures by month showed that the greatest number occurred in August, while the lowest was in February.



Motor Vehicle Theft by Month, 1983-1987

[Percent of annual total]

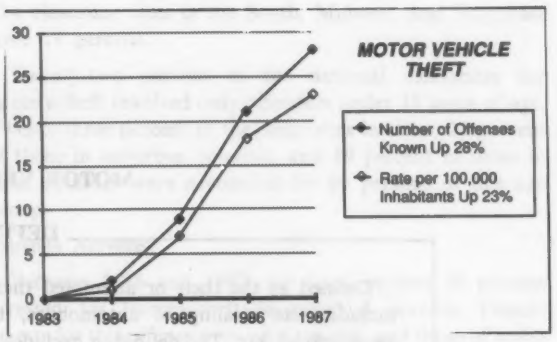
Months	1983	1984	1985	1986	1987
January	8.3	8.0	7.8	7.9	7.9
February	7.5	7.7	7.1	7.1	7.5
March	8.4	8.0	8.1	8.1	8.4
April	8.0	7.8	7.8	7.8	7.9
May	8.1	8.0	8.0	8.0	8.0
June	8.0	8.0	8.2	8.2	8.1
July	8.5	8.8	8.9	8.9	8.8
August	9.1	9.1	9.1	9.5	9.0
September	8.5	8.7	8.7	8.7	8.4
October	8.7	8.9	9.1	9.0	8.8
November	8.4	8.5	8.6	8.5	8.5
December	8.5	8.6	8.7	8.3	8.7

Trend

The number of motor vehicle thefts increased 5 percent nationally, as well as in the cities, from 1986 to 1987. The suburban counties and those cities with populations of 100,000 to 249,999 registered the largest increases, 9 percent. Rural counties showed an increase of 1 percent.

Geographically, three of the four regions experienced motor vehicle theft increases. The increases were 10 percent in the Western States, 7 percent in the Southern States, and 8 percent in the Northeastern States. A 5-percent decrease was recorded in the Midwestern States.

The accompanying chart shows that the volume of motor vehicle thefts in 1987 increased 28 percent over the 1983 volume.



Rate

The 1987 national motor vehicle theft rate—529 per 100,000 people—was 4 percent higher than the rate in 1986. The rate was 23 percent higher than in 1983 and 15 percent above the 1978 rate.

For every 100,000 inhabitants living in MSAs, there were 646 motor vehicle thefts reported in 1987. The rate in cities outside metropolitan areas (other cities) was 203 and in rural counties, 110. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem.

Among the regions, the motor vehicle theft rates ranged from 632 per 100,000 people in the Western States to 426 in the Midwestern States. The Northeastern States' rate was 629 and the Southern States' rate, 483. From 1986 to 1987, rate increases were registered in the Western States, 8 percent; the Northeastern States, 7 percent; and the Southern States, 5 percent. The Midwestern States, the only region to show a decrease, recorded a decline of 5 percent.

An estimated average of 1 of every 144 registered motor vehicles was stolen nationwide during 1987. Regionally, this rate was greatest in the Northeast where 1 of every 107 motor vehicles registered was stolen. The other three regions reported lesser rates—1 per 127 in the West, 1 per 164 in the South, and 1 per 181 in the Midwest.

Nature

During 1987, an estimated national loss of over $6 billion was due to motor vehicle theft. At the time of theft, the average value per vehicle stolen was $4,964.

Seventy-seven percent of all motor vehicles reported stolen during the year were automobiles, 15 percent were trucks or buses, and the remainder were other types.

Motor Vehicle Theft, 1987

[Percent distribution by region]

Region	Total[1]	Autos	Trucks and buses	Other vehicles
Total	100.0	77.2	14.6	8.2
Northeastern States	100.0	91.3	4.9	3.9
Midwestern States	100.0	83.2	8.7	8.1
Southern States	100.0	73.1	18.0	9.0
Western States	100.0	65.2	23.7	11.1

[1]Because of rounding, percentages may not add to totals.

Clearances

Law enforcement agencies nationwide cleared 15 percent of the motor vehicle thefts reported in their locales during 1987. Those in cities cleared 14 percent; those in suburban counties cleared 19 percent; and rural county agencies cleared 32 percent.

Regional clearance percentages for motor vehicle theft were 10 percent in the Northeastern States, 15 percent in the Midwestern States, 17 percent in the Western States, and 19 percent in the Southern States.

Persons in the under 18 age group accounted for 20 percent of the motor vehicle thefts cleared nationwide, in cities, and in suburban counties. They comprised 21 percent of the clearances in the rural counties.

Persons Arrested

During 1987, males accounted for 90 percent of the persons arrested for motor vehicle theft. Sixty percent of the arrestees were white, 39 percent were black, and the remainder were of other races.

A large proportion of motor vehicle theft arrestees was accounted for by the younger segment of the population. In 1987, 58 percent of all persons arrested for this offense were under 21 years of age, and those under age 18 comprised 40 percent of the total. Between 1986 and 1987, arrests of males under age 18 rose 13 percent and those of females, 12 percent.

Total motor vehicle theft arrests were up 11 percent and adult arrests rose 9 percent in 1987 over the previous year. Overall arrests for this offense were 46 percent higher in 1987 than in 1983 and 12 percent above the 1978 level.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Volume

A total of 102,410 arson offenses was reported by 12,810 law enforcement agencies across the country; these agencies furnished from 1 to 12 months of reports during 1987. Of these reporting agencies, 12,649 provided the detailed information—type of structure, estimated monetary value of the property damaged, etc.—from which the tables on the accompanying pages were tabulated. Further information regarding arson offenses and trends is presented in Tables 6 through 13 and arson clearances in Tables 20 through 23. Since only 8,507 agencies covering 75 percent of the United States population submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

Trend

National, city, and suburban county arson counts decreased 5 percent from 1986 to 1987. In the rural counties, a greater decline of 9 percent was experienced.

Geographically, all regions recorded arson decreases in 1987. The declines were 8 percent in the Southern States, 5 percent in both the Northeastern and Western States, and less than one-half of 1 percent in the Midwestern States.

By property type nationally, the number of arsons of mobile property declined 6 percent, arsons of structures dropped 5 percent, and those of all other property decreased 4 percent.

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

Arson Rate, Population Group, 1987

[8,507 agencies; 1987 estimated population 181,658,000: Rate per 100,000 inhabitants]

Group	Rate
Total	49.6
Total cities	57.1
Group I (cities 250,000 and over)	90.5
(cities 1,000,000 and over)	104.8
(cities 500,000 to 999,999)	74.8
(cities 250,000 to 499,999)	82.4
Group II (cities 100,000 to 249,999)	67.9
Group III (cities 50,000 to 99,999)	43.5
Group IV (cities 25,000 to 49,999)	34.6
Group V (cities 10,000 to 24,999)	28.3
Group VI (cities under 10,000)	27.0
Suburban counties	38.7
Rural counties	21.8
Suburban area	34.5

Rate

Since population coverage for arson data is lower than for the other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the 1987 rates are shown in the accompanying table.

The rates ranged from 105 per 100,000 inhabitants in cities with populations over 1 million to 22 per 100,000 rural county inhabitants. The suburban counties and all cities collectively recorded rates of 39 and 57 per 100,000 inhabitants, respectively. Overall, the 1987 national arson rate was 50 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 60 offenses per 100,000 population. Following were the Northeastern States with a rate of 50 per 100,000, the Midwestern States with 49 per 100,000, and the Southern States with 43 per 100,000 inhabitants.

Nature

As in previous years, structures were the most frequent target of arsonists in 1987 and comprised 55 percent of the reported incidents. Twenty-eight percent of the arsons were directed at mobile property (motor vehicles, trailers, etc.), while other types of property (crops, timber, etc.) accounted for 17 percent.

Arson, Type of Property, 1987

[12,649 agencies; 1987 estimated population 196,173,000]

Property classification	Number of offenses	Percent distribution[1]
Total	84,371	100.0
Total structure	46,490	55.1
Single occupancy residential	19,708	23.4
Other residential	8,762	10.4
Storage	4,541	5.4
Industrial/manufacturing	802	1.0
Other commercial	5,481	6.5
Community/public	4,428	5.2
Other structure	2,768	3.3
Total mobile	23,339	27.7
Motor vehicles	21,645	25.7
Other mobile	1,694	2.0
Other	14,542	17.2

[1]Because of rounding, percentages may not add to totals.

Residential property was involved in 61 percent of the structural arsons during the year, with 42 percent of such offenses directed at single-occupancy dwellings. Eighteen percent of all targeted structural property was either uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 93 percent of all mobile property at which arsons were directed.

Arson, Structures Not in Use, 1987

[12,649 agencies; 1987 estimated population 196,173,000]

Type of structure	Number of offenses	Percent not in use
Total	**46,490**	**17.7**
Single occupancy residential	19,708	22.3
Other residential	8,762	12.1
Storage	4,541	20.8
Industrial/manufacturing	802	13.6
Other commercial	5,481	11.9
Community/public	4,428	8.2
Other structure	2,768	25.5

The monetary value of property damaged due to reported arsons during 1987 totaled $907 million, and the average loss per incident was $10,755. The overall average for all types of structures was $17,550. While industrial/manufacturing property showed the lowest number of structural incidents, it registered the highest average loss—$37,187. Mobile properties averaged $3,571 per incident, and other targets averaged $561.

Arson, Monetary Value of Property Damaged, 1987

[12,649 agencies; 1987 estimated population 196,173,000]

Property classification	Number of offenses	Average damage
Total	**84,371**	**$10,755**
Total structure	46,490	17,550
Single occupancy residential	19,708	12,427
Other residential	8,762	12,481
Storage	4,541	15,054
Industrial/manufacturing	802	37,187
Other commercial	5,481	32,619
Community/public	4,428	18,189
Other structure	2,768	8,647
Total mobile	23,339	3,571
Motor vehicles	21,645	3,307
Other mobile	1,694	6,944
Other	14,542	561

Clearances

The national 1987 arson clearance rate was 16 percent. Rural county agencies showed the highest rate, clearing 20 percent of the arson offenses brought to their attention. Suburban county agencies cleared 18 percent and city departments, 15 percent.

Regionally, the Southern States reported a clearance rate of 20 percent; the Western States, 15 percent; and both the Midwestern and Northeastern States, 13 percent.

Thirty-six percent of all 1987 arson clearances involved only young people under age 18, a higher percentage of juvenile involvement than for any other Index crime. Persons in this age group accounted for 35 percent of structural arson clearances, 22 percent of the clearances for arsons of mobile property, and 56 percent of those of all other property.

Arson Offenses Cleared by Arrest,[1] 1987

[12,649 agencies[2]; 1987 estimated population 196,173,000]

Property classification	Number of offenses	Percent cleared by arrest
Total	**84,371**	**18.0**
Total structure	46,490	21.8
Single occupancy residential	19,708	22.0
Other residential	8,762	24.2
Storage	4,541	17.5
Industrial/manufacturing	802	12.8
Other commercial	5,481	15.4
Community/public	4,428	34.0
Other structure	2,768	15.5
Total mobile	23,339	10.4
Motor vehicles	21,645	9.8
Other mobile	1,694	17.6
Other	14,542	18.3

[1]Includes offenses cleared by exceptional means.
[2]The number of agencies used in this table is lower than the number used in Tables 20-23. To be included in this table, it was necessary that arson clearances be reported by property classification.

By population grouping, juveniles were the offenders in 38 percent of the city arson clearances, 34 percent of those in suburban counties, and 25 percent of those in the rural counties.

The accompanying tables show clearance data only for those 12,649 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (34 percent) was recorded for offenses in which community or public structures were involved, while the lowest rate (10 percent) was registered for motor vehicles.

Arson Offenses Cleared by Arrest[1] of Persons under 18 Years of Age, 1987

[12,649 agencies[2]; 1987 estimated population 196,173,000]

Property classification	Total clearances	Percent under 18
Total	**15,200**	**36.7**
Total structure	10,128	35.1

[1]Includes offenses cleared by exceptional means.
[2]The number of agencies used in this table is lower than the number used in Tables 20-23. To be included in this table, it was necessary that arson clearances be reported by property classification.

Persons Arrested

The estimated number of arrests for arson during 1987 totaled 18,000. Forty percent of the arrestees were under 18 years of age and 63 percent were under 25. Males comprised 86 percent of all arson arrestees. Seventy-three percent of those arrested were white, 26 percent were black, and the remainder were of other races.

Trends for 1986 versus 1987 show arson arrests down 2 percent nationwide and in all cities collectively. They decreased 4 percent in the rural counties and 5 percent in the suburban counties.

Arrests of persons under the age of 18 increased 1 percent from 1986 to 1987, while adult arrests showed a 5-percent decrease nationwide. During the same period, male arrests for arson were down 3 percent and female arrests, down 1 percent.

The 1987 arson arrest total for all ages was 5 percent below the 1983 level and 2 percent lower than in 1978.

CRIME INDEX TABULATIONS

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; and data on the type and value of property stolen and recovered.

Although the total number of crimes occurring throughout the Nation is unknown, information on those reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Even though population, one of these factors, is used in computing crime rates, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term population variables, such as an influx of day workers, tourists, shoppers, etc. A further discussion of various factors contributing to the amount of crime in a given area is shown on page *v* of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1987 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 6 through 9. Two-year arson trends are shown in Tables 10 through 13.

Crime Index Total

The Crime Index total rose 2 percent to 13.5 million offenses in 1987. Five- and 10-year percent changes showed the 1987 total was 12 percent above the 1983 level and 21 percent higher than in 1978.

From 1986 to 1987, overall violent crime showed virtually no change. Among the violent crimes, only aggravated assault increased, 2 percent. Robbery declined 5 percent; murder, 3 percent; and forcible rape, less than 1 percent.

The number of property crimes increased 3 percent for the 2-year period. Motor vehicle theft rose 5 percent, and larceny-theft was up 3 percent. Burglary showed little change.

Considering 5- and 10-year timeframes, the 1987 violent and property crime totals each showed increases. Violent crime was up 18 percent and property crime, 11 percent over 1983 figures. A comparison of 1978 and 1987 figures showed upswings of 37 percent for violent crime and 19 percent for property crime. National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past decade are set forth in Table 1, "Index of Crime, United States, 1978-1987." Crime rates relate the incidence of reported crime to population.

Table 2, "Index of Crime, United States, 1987," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas (other cities). See Appendix III for the definitions of these community types.

[1]Populations are Bureau of the Census provisional estimates as of July 1, except April 1, 1980, preliminary census counts, and are subject to change.
[2]Because of rounding, the offenses may not add to totals.
[3]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[4]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
All rates were calculated on the offenses before rounding.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1987," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, although the Southern States accounted for the largest volume of Crime Index offenses in 1987, they also represented the greatest regional population.

[1]Populations are Bureau of the Census provisional estimates as of July 1, 1986 and 1987, and are subject to change.
[2]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1986 and 1987 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. See "Offense Estimation", page 4 for details.
[5]Includes offenses reported by the Zoological Police.
[6]Population and offense data are not included in U.S. totals. The rates for Puerto Rico were calculated using the unrounded population.
Offense totals are based on all reporting agencies and estimates for unreported areas.

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Includes offenses reported by the Zoological Police.
[5]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1987 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. Therefore, only the state total is shown. See "Offense Estimation", page 4 for details.
[6]The rates were calculated using the unrounded population.

Table 6. — Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1987

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]Student enrollment data had not been received at the time this publication was prepared.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Forcible rape figures furnished to the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape and violent crime total categories.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

Table 8. — Number of Offenses Known to the Police, Suburban Counties, 1987

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]
* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]Forcible rape figures furnished to the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total and Modified Crime Index total categories.

Table 9. — Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1987

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]
* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[1]The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 37-38, since it is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdown.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

[1]Suburban places are within Metropolitan Statistical Areas (MSAs) and include suburban city and county law enforcement agencies within the metropolitan area. Central cities are excluded. Nonsuburban places are outside MSAs.

[2]The number of agencies used in arson trends is less than used in compiling trends for other Crime Index offenses. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

[1]The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 37-38 since it is not necessary to report arsons by detailed property classification breakdowns to be included in this table.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape categories.

Table 14. — Crime Rates, Offenses Known to the Police, Population Group, 1987

[1987 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[3]	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for other seven Crime Index offenses. Independently tabulated arson rates appear on page 37 of this publication.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Includes state police agencies with no county breakdown.
[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.
Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.
Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, and Crime Index total categories. The rates for these categories were calculated excluding the population for the State of Illinois.

Table 15. — Crime Rates, Offenses Known to the Police, Suburban and Nonsuburban Cities[1], Population Group, 1987

[1987 estimated population. Rate: Number of crimes per 100,000 inhabitants]

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 37 of this publication.
[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.
Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape categories. The rates for these categories were calculated excluding the population for the State of Illinois.
Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Table 18. — Offense Analysis, 1987, and Percent Change from 1986

[13,149 agencies; 1987 estimated population 225,052,000]

Classification	Number of offenses 1987	Percent change over 1986	Percent distribution[1]	Average value
MURDER	17,886	-2.8		$ 107

SECTION III
CRIME INDEX OFFENSES CLEARED

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies cleared 21 percent of the Crime Index offenses brought to their attention during 1987. Forty-seven percent of the violent crimes collectively were cleared. Reporting agencies recorded a 70-percent clearance rate for murder, 53 percent for forcible rape, 27 percent for robbery, and 59 percent for aggravated assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as more intense investigative efforts are often given these offenses and witnesses are frequently available to identify the perpetrators.

The overall property crime clearance rate was 18 percent. For burglary, the rate was 14 percent; for larceny-theft, 20 percent; for motor vehicle theft, 15 percent; and for arson, 16 percent. When considering the Modified Crime Index total which includes arson, the overall clearance rate remained the same, 21 percent.

Regionally, the highest total Crime Index clearance rate was registered in the West with 22 percent. Following were the South with 21 percent, the Northeast with 20 percent, and the Midwest with 19 percent. In both the West and the South, the violent crime clearance rate was 50 percent, while in the Northeast and the Midwest, it was 43 percent.

By community type, rural county law enforcement agencies showed clearances for 22 percent of the Crime Index offenses brought to their attention. Those in cities cleared 21 percent, and those in suburban counties, 20 percent.

Clearances Involving Only Persons under 18 Years of Age

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest has been made, a clearance by arrest is recorded when an offender under 18 years of age is cited to appear in juvenile court or before other juvenile authorities. Juveniles (persons under 18 years of age) accounted for an estimated 26 percent of the 1987 United States population.

Eighteen percent of the Crime Index offenses cleared by law enforcement during 1987 involved only young people under age 18. Persons in this age group accounted for 8 percent of the violent crime clearances and 21 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (5 percent), while the highest percentage was shown for arson (36 percent).

Geographically, the Midwestern States recorded the largest percentage of Crime Index offense involvement by the under 18 age group–23 percent. Juveniles were the offenders in 20 percent of the clearances in the Western States, 17 percent of those in the Northeastern States, and 15 percent of those in the Southern States.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance tables on page 38, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the State-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Percent cleared by arrest	22.3	22.2	50.1	18.7	67.8	51.1	27.9	61.1	13.1	21.5	16.5	15.4

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance table on page 38, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the State-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance tables on page 38, since it is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other city groups.

Forcible rape figures furnished by the State-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

SECTION IV
PERSONS ARRESTED

In addition to being a gauge of law enforcement's response to crime, arrest counts provide definitive data concerning the age, sex, and race of perpetrators. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, those for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. This Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Nationwide, law enforcement agencies made an estimated 12.7 million arrests in 1987 for all criminal infractions except traffic violations. When the arrest volume was related to the total United States population, the arrest rate was 5,330 per 100,000 inhabitants. In cities with populations of 250,000 or more, the rate was 7,808, the highest recorded. For suburban county agencies overall, the arrest rate was 3,949, and for rural county law enforcement, it was 3,423 per 100,000 inhabitants.

Regionally, the arrest rates per 100,000 population ranged from 4,523 in the Midwest to 6,091 in the West. The South recorded an arrest rate of 5,268 and the Northeast, 5,518.

Arrest Trends

The total number of arrests for all offenses except traffic violations increased 2 percent in 1987 as compared to the 1986 volume. During the same time period, adult arrests rose 3 percent, while those of persons under 18 years of age declined 1 percent. When considering only the eight Crime Index offenses, arrests of persons of all ages increased 2 percent, adult arrests rose 3 percent, and juvenile arrests showed virtually no change. Arrests for the Index's violent crimes increased 1 percent and those for property crimes rose 2 percent.

Similar to the national experience, 2-year trends for city agencies showed a 2-percent increase in total arrests, 1987 over 1986. Suburban county arrests were up 4 percent and rural county arrests, 3 percent.

Over the 5-year period beginning in 1983, total arrests were up 9 percent. Adult arrests and those of persons under 18 years of age rose 10 and 7 percent, respectively. Total Crime Index arrests increased 10 percent, those of adults jumped 13 percent, and arrests of juveniles under 18 years of age rose 4 percent. During the same years, 1983-1987, total violent crime arrests increased 12 percent and property crime arrests were up 9 percent.

Increases of 25 percent were shown for both total arrests and arrests for violent crimes in the 10-year period, 1978-1987. Arrests for the Crime Index offenses and the property crimes rose 18 and 16 percent, respectively.

The 1987 drug abuse violation arrest total was 13 percent above the 1986 figures and 38 percent higher than in 1983. The types of drugs involved in violations resulting in arrests during 1987 are shown by geographic region in the accompanying table.

Arrests for Drug Abuse Violations, 1987

[Percent distribution]

	United States total	North-eastern States	Mid-western States	South-ern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0
Sale/Manufacture:	25.8	34.5	27.7	24.5	20.0

Other dangerous nonnarcotic drugs	7.5	3.0	9.4	4.0	13.9

[1]Because of rounding, percentages may not add to totals.

Age

Five percent of all persons arrested nationally in 1987 were under the age of 15; 16 percent were under 18; 30 percent were under 21; and 48 percent were under 25. Persons in the under 25 age group accounted for 49 percent of arrests in the cities, 43 percent of those in the suburban counties, and 41 percent of those in the rural counties.

Age distribution figures for persons arrested for Crime Index offenses showed 29 percent were under the age of 18; 44 percent were under 21; and 59 percent, under 25. The under 25 age group was also responsible for 47 percent of the violent crime arrests and 62 percent of property crime arrests in 1987.

Sex

Eighty-two percent of the persons arrested in the Nation during 1987 were males. They accounted for 78 percent of Index crime arrests, 89 percent of those for violent crimes, and 76 percent of the property crime arrests. Males were most often arrested for driving under the influence, which accounted for 14 percent of all male arrests.

As in past years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 80 percent of arrests of women for Index crimes and 20 percent of all female arrests. Fifty-five percent of all female larceny-theft arrestees were under 25 years of age.

Two-year trends showed a 2-percent increase in the number of male arrests from 1986 to 1987; female arrests rose 4 percent. Male arrests showed a rise of 8 percent and female arrests a jump of 17 percent for the 5-year period from 1983 to 1987.

Table 24.—Total Estimated Arrests[1], United States, 1987

TOTAL[2]	12,711,600	Fraud	341,900
Murder and nonnegligent manslaughter	19,200	Embezzlement	12,700
Forcible rape	36,310	Stolen property; buying, receiving, possessing	139,300
Robbery	138,290	Vandalism	273,500
Aggravated assault	352,450	Weapons; carrying, possessing, etc.	191,700
Burglary	443,400	Prostitution and commercialized vice	110,100
Larceny-theft	1,469,200	Sex offenses (except forcible rape and prostitution)	100,100
Motor vehicle theft	169,300	Drug abuse violations	937,400
Arson	18,000	Gambling	25,400
		Offenses against family and children	58,700

		Drunkenness	828,300
Crime Index total[5]	2,646,200	Disorderly conduct	698,700
		Vagrancy	36,100
Other assaults	787,200	All other offenses (except traffic)	2,836,700
Forgery and counterfeiting	93,900	Suspicion (not included in totals)	13,500
		Curfew and loitering law violations	89,500
		Runaways	160,400

[1]Arrest totals based on all reporting agencies and estimates for unreported areas.
[2]Because of rounding, items may not add to totals.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson.

Race

Race distribution figures for the total number of arrests in the United States during 1987 showed 69 percent of the arrestees were white, 29 percent were black, and the remainder were of other races. Whites accounted for 51 percent of the arrests for violent crimes and 66 percent of those for property crimes.

All other offenses (except traffic)	660,064	504,394	150,883	2,718	2,069	100.0	76.4	22.9	.4	.3
Suspicion	1,755	1,465	284	4	2	100.0	83.5	16.2	.2	.1
Curfew and loitering law violations										
Runaways										

[1]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.
[2]Because of rounding, the percentages may not add to total.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson.

[2]Because of rounding, the percentages may not add to total.
[3]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are included in other groups.

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

SECTION V
LAW ENFORCEMENT PERSONNEL

The Nation's law enforcement community employed an average of 2.1 full-time officers for every 1,000 inhabitants as of October 31, 1987. Considering full-time civilians, the overall law enforcement employee rate was 2.8 per 1,000 inhabitants according to 12,149 city, county, and state police agencies reporting in 1987. These agencies collectively offered law enforcement service to a population of nearly 227 million, employing 480,383 officers and 160,785 civilians.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate personnel for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

The law enforcement employee average for all cities nationwide in 1987 was 2.6 per 1,000 inhabitants. By population grouping, city law enforcement employee averages ranged from 2.1 per 1,000 inhabitants in those with populations from 10,000 to 49,999 to 3.5 for those with populations of 250,000 or more. Rural and suburban counties averaged full-time law enforcement employee rates of 3.5 and 3.0 per 1,000 population, respectively.

Regionally, the highest law enforcement employee rate was in the Northeast with 2.9. Following were the South with 2.8, the Midwest with 2.5, and the West with 2.4.

Full-time Law Enforcement Employees[1], Rate per 1,000 Inhabitants, Region and Population Group, October 31, 1987

[1987 estimated population]

Region	Population Group						
	Total (9,255 cities; population 153,087,000)	Group I (60 cities, 250,000 and over; population 43,916,000)	Group II (123 cities, 100,000 to 249,999; population 17,977,000)	Group III (300 cities, 50,000 to 99,999; population 20,402,000)	Group IV (650 cities, 25,000 to 49,999; population 22,291,000)	Group V (1,604 cities, 10,000 to 24,999; population 25,115,000)	Group VI (6,518 cities under 10,000; population 23,387,000)
TOTAL: 9,255 cities; population 153,087,000: Average number of employees per 1,000 inhabitants	2.6	3.5	2.4	2.2	2.1	2.1	2.8
Northeastern States: 2,352 cities; population 39,141,000: Average number of employees per 1,000 inhabitants	2.9	4.6	3.2	2.4	2.3	2.0	2.1
Midwestern States: 2,490 cities; population 37,927,000: Average number of employees per 1,000 inhabitants	2.5	3.9	2.2	1.9	1.8	2.0	2.5
Southern States: 3,164 cities; population 43,070,000: Average number of employees per 1,000 inhabitants	2.8	3.0	2.5	2.6	2.4	2.4	3.5
Western States: 1,249 cities; population 32,950,000: Average number of employees per 1,000 inhabitants	2.4	2.6	2.0	1.8	2.0	2.1	3.7

[1]Includes civilians. Population figures were rounded to the nearest thousand. All rates were calculated before rounding.

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.1 officers per 1,000 inhabitants. By population grouping, the lowest average rate (1.7) was for cities with populations of 10,000 to 99,999; cities 250,000 or more in population recorded the highest rate, 2.8. Suburban county law enforcement agencies averaged 2.0 officers per 1,000 population, while agencies in rural counties averaged 2.4.

Geographically, the highest rate of officers to population was recorded in the Northeastern States where there were 2.4 officers per 1,000 inhabitants. Following were the Southern States with 2.2, the Midwestern States with 2.0, and the Western States with 1.7.

Nationally, males comprised 92 percent of all sworn employees. Ninety-four percent of the officers in rural counties and 93 percent of those in cities were males, while in suburban counties they accounted for 89 percent.

Full-time Law Enforcement Officers, Rate per 1,000 Inhabitants, Region and Population Group, October 31, 1987
[1987 estimated population]

Region	Total (9,255 cities; population 153,087,000)	Population Group: Group I (60 cities, 250,000 and over; population 43,916,000)	Group II (123 cities, 100,000 to 249,999; population 17,977,000)	Group III (300 cities, 50,000 to 99,999; population 20,402,000)	Group IV (650 cities, 25,000 to 49,999; population 22,291,000)	Group V (1,604 cities, 10,000 to 24,999; population 25,115,000)	Group VI (6,518 cities under 10,000; population 23,387,000)
TOTAL: 9,255 cities; population 153,087,000: Average number of officers per 1,000 inhabitants	2.1	2.8	1.8	1.7	1.7	1.7	2.2
Northeastern States: 2,352 cities; population 39,141,000: Average number of officers per 1,000 inhabitants	2.4	3.7	2.7	2.0	1.9	1.7	1.7

Western States: 1,249 cities; population 32,950,000: Average number of officers per 1,000 inhabitants	1.7	2.0	1.4	1.3	1.5	1.5	2.6

Population figures were rounded to the nearest thousand. All rates were calculated before rounding.

Civilian Employees

Civilians made up 25 percent of the total United States law enforcement employee force in 1987. They represented 21 percent of the police employees in cities, 32 percent of those in rural counties, and 33 percent of the suburban law enforcement strength.

Law Enforcement Officers Killed and Assaulted

Seventy-two law enforcement officers were feloniously slain in the line of duty during 1987, 6 more lives lost than in 1986. The increase in 1987 followed a decline in 1986 whose annual total was lower than for any year since 1968.

Extensive data on line-of-duty deaths and assaults on city, county, state, and Federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted.*

SECTION VI
APPENDIX I
TABLE METHODOLOGY

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

Key: A) Column 1 shows the table numbers. Included are Tables 1 through 64, *Crime in the United States-1987.*

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table. There are three levels of participation:

1. Agencies having reported data for all 12 months of the year.
2. Agencies having reported data for at least one month but less than 12 months of the year.
3. Nonreporting agencies.

The tabulations presented in the publication employ statistics from one or more of these participation levels. For example, Table 2 includes all three agency reporting levels, but Table 14 presents only data for agencies having reported the entire year.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1987 statistics are consistent with Table 2. Pre-1987 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimations for each year except April 1, 1980. The offense breakdowns are according to UCR crime definitions (App. II). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1978 to 1987.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1987).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1987, Bureau of the Census provisional estimates. The tabular breakdowns are in accordance with UCR crime definitions (App. II) and population classifications (App. III).	Represents an estimation of national reported crime activity in 1987.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1987).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1987, Bureau of the Census provisional estimates.	Represents the 1987 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1987 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1986 and 1987. Population statistics represent July 1 provisional estimates for 1986 and 1987. The offense breakdowns are according to UCR crime definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1987).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1987, Bureau of the Census provisional estimates. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports. The offense breakdowns are according to UCR definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic differences.
6	All law enforcement agencies submitting complete reports for 12 months in 1987.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The populations are July 1, 1987, estimates for each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic differences.
7	All university/college law enforcement agencies submitting complete reports for 12 months in 1987.	The student enrollment figures, which are provided by the U.S. Department of Education, were not available when this publication was prepared.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, plus other demographic differences.
8	All law enforcement agencies submitting complete reports for 12 months in 1987.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1987.	Represents crime reported to individual law enforcement agencies in suburban counties, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic differences.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
9	All law enforcement agencies submitting complete reports for 12 months in 1987.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on July 1, 1987, estimates for individual agencies.	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic differences.
10-13	All law enforcement agencies submitting complete reports for at least 6 common months in 1986 and 1987.	The 1987 crime trend statistics are 2-year comparisons based on 1987 reported crime activity. Only common reported months for individual agencies are included in 1987 trend calculations. Populations represent July 1, 1987, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 13 due to editing procedure and lower submission rate.
14-17	All law enforcement agencies submitting complete reports for 12 months in 1987.	The 1987 crime rates are the ratios of the aggregated 1987 crime volumes and the aggregated 1987 populations of the contributing agencies. Population statistics represent July 1, 1987, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 17 due to editing procedure and lower submission rate.
18, 19	All law enforcement agencies submitting complete reports for at least 6 months in 1987.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total with each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1986 and 1987.	Aggravated assault is excluded from Table 18. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
20-23	All law enforcement agencies submitting complete reports for at least 6 months in 1987.	The 1987 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1987. Population statistics represent July 1 estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
24	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1987).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 26) divided by the percent of total group population reporting (according to July 1, 1987, estimates).	
25, 26	All law enforcement agencies submitting complete reports for 12 months in 1987.	The 1987 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1987 reported arrest statistics and population. The population statistics represent the July 1, 1987, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications/geographical configuration (App. III).	
27, 28	All law enforcement agencies submitting complete reports for 12 months in 1978 and 1987.	The arrest trends are the percentage differences between 1978 and 1987 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1987, estimates.	
29, 30	All law enforcement agencies submitting complete reports for 12 months in 1983 and 1987.	The arrest trends are the percentage differences between 1983 and 1987 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1987, estimates.	
31, 32	All law enforcement agencies submitting complete reports for 12 months in 1987.	The arrest trends are 2-year comparisons between 1986 and 1987 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1987, estimates.	
33-38	All law enforcement agencies submitting complete reports for 12 months in 1987.		Slight decrease in coverage for Table 38 due to editing procedure and lower submission of race data.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
39, 40	All city law enforcement agencies submitting complete reports for 12 months in 1986 and 1987.	The 1987 city arrest trends represent the percentage differences between 1986 and 1987 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
41-44	All city law enforcement agencies submitting complete reports for 12 months in 1986 and 1987.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 44 due to editing procedure and lower submission of race data.
45, 46	All suburban county law enforcement agencies submitting complete reports for 12 months in 1986 and 1987.	The 1987 suburban county arrest trends represent percentage differences between 1986 and 1987 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	
47-50	All suburban county law enforcement agencies submitting complete reports for 12 months in 1987.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Table 50 due to editing procedure and lower submission of race data.
51, 52	All rural county law enforcement agencies submitting complete reports for 12 months in 1986 and 1987.	The 1987 rural county arrest trends represent percentage differences between 1986 and 1987 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	
53-56	All rural county law enforcement agencies submitting complete reports for 12 months in 1987.	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Table 56 due to editing procedure and lower submission of race data.
57, 58	All suburban area law enforcement agencies submitting complete reports for 12 months in 1986 and 1987.	The 1987 suburban area arrest trends represent percentage differences between 1986 and 1987 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
59-62	All suburban area law enforcement agencies submitting complete reports for 12 months in 1987.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Table 62 due to editing procedure and lower submission of race data.
63	All law enforcement agencies submitting complete reports for 12 months in 1987.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1 provisional estimates for 1987. The tabular breakdowns are according to UCR crime definitions (App. II).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
64	All law enforcement agencies submitting complete reports for 12 months in 1987.	Population statistics represent July 1, 1987, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II
OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are:

Criminal homicide.– a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape.– The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used– victim under age of consent) are excluded.

Robbery.– The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault.– An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary-breaking or entering.– The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft).– The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft.– The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson.– Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

Other assaults (simple).– Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting.– Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud.– Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement.– Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing.– Buying, receiving, and possessing stolen property, including attempts.

Vandalism.– Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.– All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice.– Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice). – Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations.– State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling.– Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children.– Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence.– Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws.– State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness.– Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct.– Breach of the peace.

Vagrancy.– Vagabondage, begging, loitering, etc.

All other offenses.– All violations of state or local laws, except those listed above and traffic offenses.

Suspicion.– No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws.– (persons under age 18).– Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways.– (persons under age 18).– Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III
UNIFORM CRIME REPORTING AREA DEFINITIONS

Community Types

Uniform Crime Reporting data are often presented using three community-type aggregations. These are Metropolitan Statistical Areas (MSAs), other cities, and rural counties.

The MSA concept was developed to facilitate the analysis and dissemination of uniform statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal agencies to utilize the same boundaries when publishing statistical data. Each MSA is an integrated economic and social unit with a recognized large population nucleus. Detailed criteria followed in establishing and defining MSAs can be found in the U. S. Department of Commerce publication, *State Metropolitan Area Data Book*, 1986 edition.

An MSA includes a central city of at least 50,000 population or an urbanized area of at least 50,000. The county containing the central city and contiguous counties having strong economic and social relationships to the central city and county are also included. Counties in MSAs are designated suburban in UCR. An MSA may cross state lines.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. Some counties, however, have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 77 percent of the total United States population in 1987. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded.

"Other cities," most of which are incorporated, are those outside MSAs. They comprised 9 percent of the 1987 population of the United States.

Rural counties, like "other cities," are outside MSAs. Covering areas not under the jurisdiction of city police departments, rural county law enforcement agencies offered service to 14 percent of the national population in 1987.

The following diagram illustrates the aforementioned discussion of the community types.

	MSA	NON-MSA
CITIES	CENTRAL CITIES 50,000 AND OVER	OTHER CITIES
	SUBURBAN CITIES	
COUNTIES (Unincorporated areas)	SUBURBAN COUNTIES	RURAL COUNTIES

Population Groups

The population group classifications used by the UCR Program are:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City	Less than 10,000
VIII (Rural County)	County	N/A
IX (Suburban County)	County	N/A

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. To obtain the 1987 figures, for example, state growth rates, as supplied by the Bureau of the Census, were applied to every jurisdiction within each state. The base figures were 1986 Bureau of the Census estimates for all counties and cities.

The following table shows the number of UCR contributing agencies within each population group for 1987.

Population Group	*Number of Agencies*	*Population Covered*
I	62	44,693,000
II	127	18,574,000
III	321	21,859,000
IV	689	23,636,000
V	1,694	26,589,000
VI	7,661	25,200,000
VIII (Rural County)	3,715	34,009,000
IX (Suburban County)	1,677	48,839,000
Total	15,946	243,400,000[1]

[1]Because of rounding, the population covered does not add to total.

Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

New England	Middle Atlantic
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

MIDWESTERN STATES

East North Central	West North Central
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

SOUTHERN STATES

South Atlantic	East South Central
Delaware	Alabama
District of Columbia	Kentucky
Florida	Mississippi
Georgia	Tennessee
Maryland	West South Central
North Carolina	Arkansas
South Carolina	Louisiana
Virginia	Oklahoma
West Virginia	Texas

WESTERN STATES

Mountain	Pacific
Arizona	Alaska
Colorado	California
Idaho	Hawaii
Montana	Oregon
Nevada	Washington
New Mexico	
Utah	
Wyoming	

APPENDIX IV

APPENDIX IV — Index of Crime, Metropolitan Statistical Areas, 1987 — Continued

Metropolitan Statistical Area	Population	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[3]	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]
Mayaguez, Puerto Rico M.S.A.	**211,116**												
Total area actually reporting	100.0%	6,155		1,065	5,090	25	25	406	609	2,561	1,879	650	
Rate per 100,000 inhabitants		2,915.5		504.5	2,411.0	11.8	11.8	192.3	288.5	1,213.1	890.0	307.9	
Ponce, Puerto Rico M.S.A.	**233,975**												
Total area actually reporting	100.0%	8,490		2,045	6,445	40	34	1,185	786	2,561	3,217	667	
Rate per 100,000 inhabitants		3,628.6		874.0	2,754.6	17.1	14.5	506.5	335.9	1,094.6	1,374.9	285.1	

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 6.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, violent crime, and Crime Index total categories.
